Who we are

Welcome to Urban Group, New Zealand's Premier Gate & Fence Supplier.

For three generations we've been ensuring New Zealand's buildings and boundaries look their best with enduring style and security.

For four decades we have worked on some of our country's most innovative projects. Our efforts have helped boost bottom lines, meet deadlines and enhance fencelines.

We take pride in both the expertise of our team and their willingness to put this experience to the test. No matter the size, scope or style of project, the right result is only achieved with the right frame of mind. We look beyond the boundaries and deliver new methods of design and construction.

We keep our eye on the details and ensure high standards every step of the way, from scoping and design through to engineering, fabrication and distribution.

Only with this dedication to exceptional service and quality products can we connect with our clients, helping them to protect and uplift their projects.

Fast.

Quick delivery anywhere in New Zealand.

Easy.

Clear, precise and prompt quotes.

Convenient.

Large ex-stock range, ready when you are.

Confident.

10-year warranty on all in-house manufacturing.

- Balustrades

Fresno:

Delivering equal amounts privacy and personality, the Fresno offers an adaptable, cost-effective and sophisticated aluminium fencing result.

As an ex-stock model we've always got the Fresno close by and ready to go - and it's stocked in various widths too. Once on-site the panel can be adapted easily to fit custom lengths where required. With fast order turnaround times and easy installation, the Fresno ensures projects can be scoped and delivered with no delay and even less stress.

8

Ideal for:

- Residential
- Low rise apartments
- Screening off refuse and plant areas

Features:

- Easily adaptable on site
- Allows for extra privacy
- Cost effective

Height: **1800mm**
 Width: **700mm, 1200mm, 2000mm**
 Horizontals: **65mm x 16, 20mm gaps**
 Post: **65mm²**
 Raking panels available: **No**

Paladin:

The striking vertical fin design of the Paladin is the first thing you'll notice. With this approach any sense of posts is kept to a minimum, making for a consistent look along the entire fencing line.

Such a seamless look is one reason behind the panel's popularity with architects and landscape designers. While minimalist in style, the design also provides well-balanced support and, helpfully for New Zealand's fencing companies, absolute ease and speed of installation.

Ideal for:

- Architectural residential housing
- Playgrounds
- Parks
- Streetscapes

Features:

- Seamless design
- Corrosion-resistant easy-care
- Available in a range of colours

Height:	1200mm
Width:	2400mm
Horizontals:	40mm²
Verticals:	16mm Vertical fins
Post:	100x25mm RHS
Raking panels available:	No

Premier:

With built-tough aluminium and easy-on-the-eye proportions, our Premier panel looks the part and delivers the goods year after year.

The large profile of this panel and robust structure makes it suitable for a variety of end uses: everything from retaining walls to swimming pools, cycleways to child's play. Powder coated in a variety of available colours, this fence is a popular choice with a huge range of different companies and organisations throughout New Zealand. We're also the only company in New Zealand who provides this type of design as a raking fence panel too, so you can be assured it's also ideal for hilly terrain.

.10

Ideal for:

- Pool safety fencing
- Balustrade and retaining wall barriers
- Childcare/parks
- Cycleways/civil fencing

Features:

- Hard to bend or dent rails
- Balanced aesthetic with bottom rail
- Available as raking panel
- Corrosion-resistant aluminium
- Exclusively available as raking panel up to 22 degrees

Heights:	1000mm, 1200mm
Width:	2400mm
Horizontals:	40mm²
Verticals:	19mm², 91mm gaps
Post:	50mm or 65mm
Raking panels available:	Yes

Maximus:

Some walls can be challenging to properly safeguard, particularly with the various changes in heights and angles to plan for and protect from. That's where the Maximus rises to the occasion.

The Maximus fence panel was designed specifically for quick and efficient wall balustrade installation. It's heavy-duty top rail and robust construction ensures the highest levels of protection and, as it can rake up to 30 degrees, it can climb steep terrain and safely conquer territory. Complying with the NZBC F4 specification requirements, it can be installed at 2.4m centres with classical style and maximum strength.

Ideal for:

- Retaining walls
- Complies with pool standards
- Childcare/parks
- Cycleways/civil fencing

Features:

- Rakeable to 30 degrees
- Complies with NZBC F4
- Heavy duty top rail

Heights:	1200mm
Width:	2400mm
Horizontals:	Top 50mm², Bottom 40mm²
Verticals:	19mm², 91mm gaps
Post:	65mm steel post
Raking panels available:	Yes

Assure:

The adaptable style of the Assure panel looks good no matter which way you look at it. Being able to turn the panel upside down is a big part of its appeal - and so too is the option to use Assure raking panels to meet the demands of steep terrain.

Residential placement often uses the panel with the studded side up, and the flat-top option makes it ideal for the school and childcare environment. Strong and robust, delivering years of maintenance-free security you'll find that no matter what way Assure goes, it's always right side up.

.12

Ideal for:

- Residential and pool fencing
- Balustrade and retaining wall barriers
- Childcare/schools
- Cycleways/civil fencing

Features:

- Strong, robust construction
- Lightweight, easy to install
- Available 1200mm/1500mm/1750mm heights
- Exclusively available as raking panel up to 30 degrees

Heights: 1200mm, 1500mm, 1750mm
 Width: 2400mm
 Horizontals: 38x25mm
 Verticals: 19mm², 80mm gaps
 Post: 50mm or 65mm
 Raking panels available: Yes

Assure HD:

Since we added this panel in 2016 other companies have released their own versions. Which makes sense - it's very popular. However when you need the most robust aluminium fence panel available, stick with the original.

With a double top rail for added strength and large vertical bars that can't easily be damaged, the Assure HD panel has been designed to comply with MOE specifications for schools as well as meeting pool regulations for residential use. Providing first-rate durability and security while avoiding an overly threatening appearance, it's used frequently in commercial applications. We've stayed ahead of the competition with our raking version of the Assure HD as well - this option can rake up to 20 degrees to accommodate extremely steep terrain.

Ideal for:

- Designed purposely for schools
- Balustrade and retaining wall barriers
- Childcare/parks
- Cycleways/civil fencing

Features:

- Double top rail for added strength
- Heavy-duty construction
- Large anti-climb gap in vertical bars
- Available in 1500mm/1800mm heights
- Exclusively available as raking panel up to 20 degrees

Heights:	1500mm & 1800mm
Width:	2350mm
Horizontals:	40mm²
Verticals:	25mm², 99mm gaps
Post:	65mm
Raking panels available:	Yes

Secura:

It's coming up on two decades since we introduced the Secura panel. Since then the strong spiked tops of this panel have become the go-to fence for many a New Zealand business and highway.

Built tough and made to last, the Secura fence provides a brilliant deterrent to would-be intruders. Combining a double rail for added strength, large virtually indestructible vertical bars, and additional spikes on the top, it's got all the design features needed for a security fence. This is also available as a raking panel, which allows it to rake at an angle of up to 20 degrees. It's well designed for a great looking installation, making it ideal for road frontages too. Sliding, cantilever and swing entry gates can also be made to match - ensuring seamless and secure boundary protection.

.14

Ideal for:

- Industrial fencing
- Commercial security fencing
- Road frontages
- Retail

Features:

- Double rail for added strength
- Spiked top to deter unwanted hand-holds
- Available in 1800mm/2100mm heights
- Exclusively available as raking panel up to 20 degrees

Heights:	1800mm, 2100mm
Width:	2350mm
Horizontals:	40mm²
Verticals:	25mm², 99mm gaps
Post:	65mm
Raking panels available:	Yes

Plain:

Plain by name but attractive in value, it's the perfect choice for residential use when you need an entry-level panel that's strong, reliable and cost-effective.

We've been supplying this panel for close to two decades now and it's safe to say, with the obvious strengths it provides, we'll be selling it for years to come. Compliant for pool fencing and quick to install in walkway and boundary applications, the Plain panel fits the budget as easily as it fits the landscape.

Ideal for:

- Pool fencing
- DIY installation
- Light residential use
- Cost-effective placement

Features:

- Slim vertical tubes
- Profiled rails
- Corrosion-resistant aluminium
- 1200mm height

Heights: **1200mm**
 Width: **2400mm**
 Horizontals: **38x25mm**
 Verticals: **16mm rounds, 89mm gaps**
 Post: **50mm**
 Raking panels available: **No**

StabiFence:

StabiFence met our requirements for a quality sustainable fencing system that had the warmth of timber but avoided the inconvenience of splitting, fading and high maintenance.

StabiFence is a StabiWood Recycled Wood Plastic Composite made with a proprietary mix of 90% recycled material. StabiFence is a system designed for quick installation and a long life of classic clean lines you and your customers can rely on - with a 10 year peace of mind guarantee.

.16

Our most popular colours:

Solid Panel:

- Height: 1400mm, 1600mm, 1800mm, 2000mm
- Width: 1800mm
- Posts: 68mm² supplied to suit fence height
- All hardware supplied

Slat Panel:

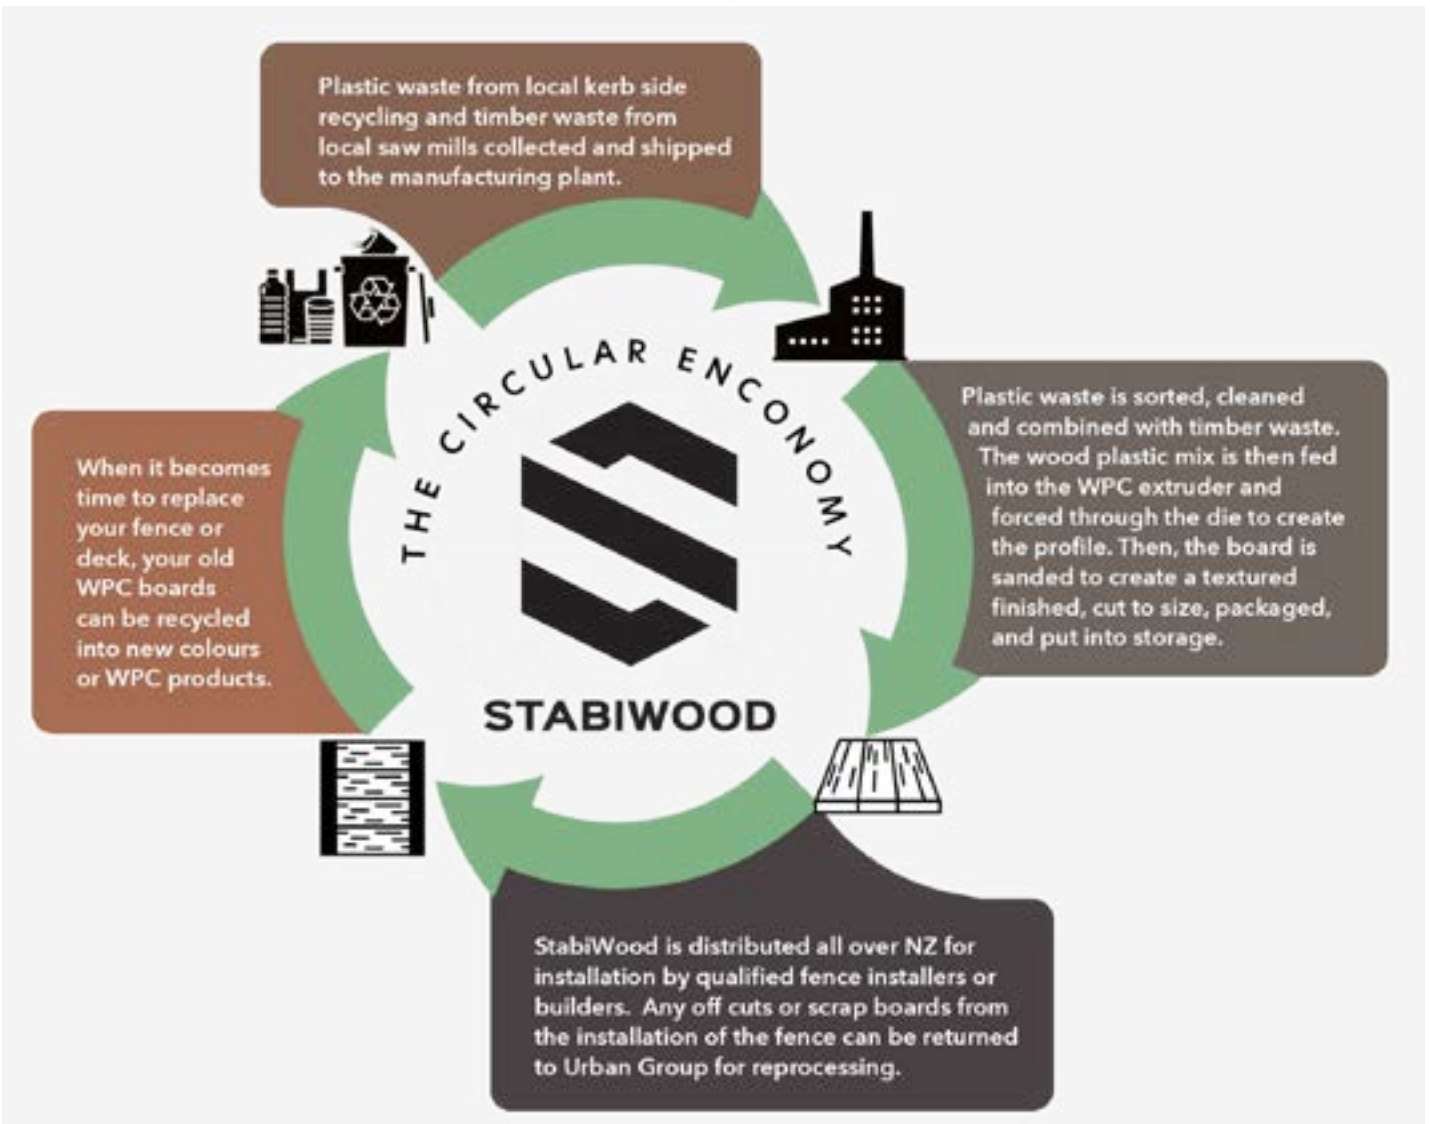

- Height: 1400mm, 1600mm, 1800mm, 2000mm
- Width: 1600mm
- Posts: 68mm² supplied to suit fence height
- All hardware supplied

StabiDeck:

StabiDeck avoids the inconvenience of splinters, fading and the high maintenance associated with traditional hardwood decking.

StabiDeck is a StabiWood Recycled Wood Plastic Composite made with a proprietary mix of 90% recycled material. StabiDeck is a system designed for quick installation and a long life of classic clean lines you and your customers can rely on - with a 10 year peace of mind guarantee. StabiDeck is available in a range of colours across our Rustic and Classic styles.

Features:

- Quick to install - more installs in less time
- Splinter free
- Long Life - colour fastness, UV resistance for durability
- Enduring - impact and scratch resistant, no warping/twisting
- Colour fast - high UV protection and homogenous colour without fading
- No visible fixings
- Slip tested

Thickness: **19mm**
 Width: **140mm (145mm with a 5mm gap)**
 Length: **4800mm**
 Fixings: **Non visible fixings at max 400mm centres**

Classic Colours:

Rustic Colours:

Gates:

We've built customised aluminium gates for longer than any other New Zealand company. Our customer service team is with you from start to finish to ensure the result is one that fits perfectly.

Our four decades of experience with these products makes a big difference when it comes to delivering exacting professionalism. We have taken a big-picture view of our work in this sector. The considerable investment in our manufacturing facilities allows us to cut, drill, weld, pre-treat and powder coat gates to the highest of standards.

Gate Types:

- Pre-made gates
- Traditional gates
- TGV gates
- Louvre gates
- Slat gates
- Panel gates
- Laser cut gates

Features:

- Made to your specifications
- Sliding, swing or cantilever
- Automated
- Powdered coated in a range of colours
- Low maintenance aluminium

Automation:

Urban Group NZ have partnered with quality, automation manufacturers to give you the product depth for every scenario. These Italian manufacturers are committed to providing innovative products with the highest level of quality and are chosen as they manufacture automation products "in-house".

Our wide range of products means that you will have a solution fit for purpose for your project.

Features:

- Encoder technology to provide obstacle detection for an enhanced level of safety
- Automatic self-learning of opening and closing times
- Compatible to run on solar power systems
- Residential/Commercial & Industrial with suitability for gates up to four tonnes

FAQ's

Construction

Why is aluminium the preferred raw material?

Aluminium is lightweight but strong, easy to work with and gives the best surface finish once powder coated. Unlike steel the surface is smooth and naturally resistant to rust. So you can be sure your fences and gates will last a lifetime.

Where are the gates and fences built?

All our custom gates and fences are made at our Levin facility. We have invested in our machinery to ensure our in-house production delivers the quickest lead times and best quality product.

How many colours are available?

We have literally hundreds! We can powder coat any colour from the Dulux or the Interpon range.

Is there a warranty available?

For all custom products we manufacture, we offer a ten-year warranty on powder coating and workmanship. Imported products have a one-year warranty period.

Does your fencing meet all necessary codes?

Of course it does - F4, B2, C3 just to mention a few. We also have options to meet balustrade and pool regulations and all Ministry of Education specifications. The only code our fencing doesn't meet is morse code. But, if you tap them properly, who knows?

How to work with us

What is the best way to start including your fencing products on our projects?

Get in contact and our project teams will walk you through the process.

I'm an architect, how can Urban Group help me?

We work with Architects across the country, for bespoke projects and developments - we can have an account manager discuss your unique requirements.

Does Urban Group supply & install?

Urban Group is a B2B supplier - we manufacture and supply for our network of installers, developers and builders around NZ.

We have multiple projects that have different fencing requirements. How can Urban Group assist us?

Urban Group has the experience to walk your designers, architects, site managers and procurement staff through the process.

What is involved in the initial fence design process?

We can tailor the fence and gate designs to suit your specifications. Our four decades of experience allow us to offer advice on layout, design restrictions and budget concerns.

Shipping

How fast can you ship gates and fences around New Zealand?

We always aim to ship product in 1 to 2 days in the North Island and 2 to 3 days in the South Island. We are also exploring new distribution opportunities in the South Island to help bring shipping times here into line with the North Island.

Are there any locations where you don't ship?

To put it simply: no. From the top to the bottom of the country if you need it, we'll find a way to get it to you.

How do you ship?

If the order is relatively small we ship by courier - this is the fastest and most efficient way of getting the fencing from A to B. For larger orders we use specialised carriers as they have the experience and resources to move in bulk.

How much does shipping cost?

We negotiate with shipping companies to get the very best deal for our customers. It's important to remember here that we don't work for the shipping companies - they work for us.
